The Year in Review and the Year to Come

When I sat down to write my first message for the President’s Corner as your new president, I decided to look at the first message written by my predecessor for reference. That newsletter focused on two primary objectives, updating the section’s web site and the Pennsylvania Infrastructure Report Card. The first was an undertaking that was internal to our section while the second required a coordinated effort from all four sections of ASCE within the Commonwealth. With those two major events undertaken in the past year I thought it would be good to start by reviewing the year that was.

The very first paragraph of the Fall 2013 newsletter set a goal for updating the section’s web site. Well, I am happy to report that the mission has been accomplished in outstanding fashion. Our new website went on line on October 6, 2014. In fact, that is where I accessed the newsletter that I used for reference. Hopefully many of you are reading this on-line and appreciate the improvements that have been made. For those members reading this in hard copy, I encourage you to visit the new web site. In addition to the newsletter archives, there are many features that I think you will find useful and informative. Particularly the calendar page, which conveniently shows all of the activities planned for the section this year along with links to sign-up for each event on-line. Members also have the option to subscribe to the calendar which will automatically synchronize new events to your electronic calendars.

Members can further enhance the image of the new web site by providing photographs of your projects to be posted on the home page. At the present time there is only one picture featured but the page has been designed to scroll through a library of photographs so that each time you return to the home page a new photograph will appear across the header. We would really like to use the home page to showcase a variety of exciting civil engineering projects being accomplished in the Lehigh Valley and Northeast Pennsylvania. The Board of Directors is always looking for interesting projects to incorporate into the program schedule as well. Posting your project in the “Comments” page is a great way to get your project on our radar as a potential meeting topic.

Continued on next page
Presidents Corner (Continued)

The “Job Postings” page contains relevant engineering positions within our section’s territory. If your firm would like to advertise an open position, please use the “Comments” page to contact our website committee. As always, the Board welcomes your suggestions to improve the section or if you are interested in volunteering on the Board or a Committee. The Board is currently seeking candidates to fill an open position on the Legislative Affairs Committee.

The “About” page features links to pages on the history of the Lehigh Valley Section, the listing of current board of directors, the section constitution and By-laws, past presidents, and local landmarks. There are even links to the other three ASCE sections in Pennsylvania. I encourage everyone to use this page to keep up to date on the activities in the other Pennsylvania sections and projects that are being completed across our Commonwealth.

The Pennsylvania Infrastructure Report Card was released in July 2014. Each section held a news conference and issued a press release. The Lehigh Valley Section news conference was held at the PennDOT District 5-0 office on Hamilton Street in Allentown. The news conference was well attended by reporters from the local media and representatives from PennDOT, local governments and the various water, waste water and transportation authorities. All of the state legislators within the area encompassed by the Lehigh Valley Section were invited to attend but had to decline as the legislature was in session during the week the report card was released. These legislators were urged to attend the news conference being held by the Central Section in Harrisburg, PA. All four sections continue to hold a monthly conference call to plan and coordinate events to promote the report card. As you may have guessed by now, there is a link to the report card on the home page of the website for those that would like to review the report card for themselves.

This year is already well underway thanks to the help of several enthusiastic new members that are infusing new energy and ideas into the Board of Directors. Meetings to date have been the annual summer picnic at Monocacy Park in Bethlehem, PA on September 18th and a tour of Lehigh University’s ATSS facility on September 28th. In October, we toured the rehabilitation of the 8th Street Bridge in Allentown, PA. Both the ATSS and 8th Street Bridge tours and presentations qualified for Professional Development Hours (PDHs). The Younger Members Forum (YMF) has been busy holding monthly happy hours at various venues throughout the Lehigh Valley. The annual YMF Allentown bridge tour was held in October. The YMF also sent a representative to the ASCE Leadership Symposium in Reston, Virginia in September. Articles on several of these events can be found later in this issue of the newsletter.

This month, there is a joint function among the four Pennsylvania sections of ASCE to attend the Penn State University versus Michigan State University football game on Saturday, November 29th with a pre-game tailgate party. For those interested in attending the game and/or tailgate, you can find more information on our web site including a link to purchase tickets.

We will close out the year with the annual Holiday Banquet at the ArtsQuest Center at SteelStacks on Friday, December 5, 2014. The keynote speaker will be Aurel Armtdt of the Lehigh County Authority (LCA) who will speak about the merging of several of the smaller municipal systems with the Lehigh Valley.

The New Year will kick-off with a hockey game at the new PPL center in Allentown, PA to watch the Lehigh Valley Phantoms play the Hersey Bears on Friday, January 30, 2015. The Lehigh Valley Engineering Council (LVEC) is planning the Engineer’s Week banquet in February and the East Penn Section of the American Society of Highway Engineers (ASHE) is planning a joint meeting with LVASCE in March. The April meeting will feature student project presentations by the Lehigh University and Lafayette College Student Chapters. Preliminary topics for the spring meetings include the geotechnical aspects of the multi-billion dollar Tappan Zee Bridge replacement project in New York, the Catasauqua Dam rehabilitation or the Whitehall Water Treatment Plant. We hope to conclude the year by attending another baseball game at the Iron Pigs or possibly the Wilkes-Barre /Scranton Railriders. Watch for email blast announcements or visit the web page to keep up to date on the events being planned for the 2014-15 section year.

Dion R. Campbell, P.E., M.ASCE
President, ASCE Lehigh Valley Section

Lehigh Valley Section Members and Iron Pigs Baseball – a Winning combination!
By: J. Scott Stenroos, P.E., M.ASCE

On August 15th, 20 members of the Lehigh Valley Section and their guests visited the fabulous Coca-Cola Park to see the Buffalo Bisons play the Lehigh Valley Iron Pigs. Pitcher Daniel Norris silenced the IronPigs’ bats, striking out thirteen batters in less than six innings to hand the Buffalo Bisons a 7-1 victory in Friday night’s series opener in front of a capacity sellout crowd at Coca-Cola Park.

The stadium, food and friendship were enjoyed by all on a great summer night. Although the Iron Pigs did not win it was a great outing for the Lehigh Valley Section and we look forward to offering another baseball night out next season.

The Annual Summer Picnic
By: Kyle John, EIT, A.M.ASCE

How many engineers does it take to start a charcoal grill? Approximately 5! We found that out the hard way on the evening of September 18, 2014 as members and their families gathered at the Monacacy Park in Bethlehem, PA for the annual summer picnic. After some tinkering with the charcoal stoves, we were finally able to get some burgers and dogs grilled up for all of the hungry attendees. Other menu items included pasta and potato salads, veggies and dip and cookies for dessert. Those attendees who were not too busy feasting, participated in lawn games such as bean bag toss and KanJam.

Overall this was a great family gathering. Make sure to keep an eye out for the spring newsletter for details on the 2015 summer picnic.

Hanover Engineering Associates Inc

Civil, Municipal & Planning, Structural, Surveying, Environmental, Transportation, Utility Line Permitting

Bethlehem Office
252 Brodhead Road, Suite 100, Bethlehem, PA 18017-8944 • Fax 610.691.6968

- Geology
- Hydrogeology
- CAD/GIS/GPS

Proudly serving our Clients & Communities for over 40 years with additional Offices located in Allentown, Lancaster, Elizabethtown, Poconos, Towanda, Wellsboro, & New Castle in PA, and Canton Ohio.
The Infrastructure Report Card and funding for infrastructure projects to improve the report card have been the focus of Legislative Affairs for our section over the past year. The national and Pennsylvania report cards have seen quite a bit of exposure effectively highlighting issues throughout the country as well as in our state.

The PA Infrastructure Report Card release was highlighted in the Summer LVASCE Newsletter. A Report Card containing seven (7) “D”s, six (6) “C”s and three (3) “B”s should get everyone’s attention. It has been discussed extensively by the Lehigh Valley and Philadelphia news media.

A success in our advocacy efforts was the passage of Act 89 funding for transportation infrastructure. There are new taxes (or fees if you prefer) at the wholesale level on transportation fuels. While you may not have noticed these additional costs because supply and demand are depressing gasoline prices, a large amount of road work has started up in the Lehigh Valley as well as other areas in the State.

State funding is only part of the picture for transportation funding. The US Congress only continued funding for the Highway Trust Fund until May 2015. There will [hopefully] be another vote to continue this fund before it runs out of money. Here is where ASCE members can have an effect by becoming a key contact to our elected officials. ASCE’s Key Contacts program has extensive information on ASCE’s policy positions, legislative contacts and tools for influencing your representatives. You can use the “Click and Connect With Congress” tab to create a letter to congress on your position on key civil engineering issues. Give it a try — you can have a letter out to your representatives in a few minutes.

In addition, this year we will try getting our members out to the local offices of our representatives — particularly when the Transportation Trust Fund legislation becomes active. We have participated in the ASCE Legislative Fly-In for many years. Peter Terry has lead this effort. We feel we can have additional impact by having more members visit the local offices of our representatives with our support of funding for the Trust Fund. Visiting the local office can be as effective as going to Washington DC while saving each of us a great deal of time and money. Getting to know your representatives, the legislative process and the issues can have a positive effect on your business and personal situation as well as the infrastructure we all use.

Stay tuned for our next steps...
Allentown Bridge Tour  
**By: Greg Kuklinski, P.E., M.ASCE**

On Thursday, October 23, 2014, 10 Lehigh University Students, Younger Members and Section Members attended the 5th Annual Allentown Bridge Tour. The tour was led by Dr. Ben T. Yen of Lehigh University and Greg Kuklinski of Alfred Benesch and Company.

The tour started at the new 15th and Ward Street Bridges over Martin Luther King Jr. Drive and the Little Lehigh Creek. Greg Kuklinski, Project Manager of the design portion of the project gave a description of the design and construction of both bridges.

The tour then continued from the newest bridge in the city to the oldest at the Bogert Covered Bridge which is a wooden Burr Truss Bridge over the Little Lehigh Creek. Dr. Yen gave a brief description of the bridge and discussed its repairs over the years. This bridge was listed on the National Register of Historic Places in 1980.

The last bridge on the tour was the concrete open spandrel arch bridge of I-78 over the Little Lehigh Creek. Built in 1958, the bridge is 10 spans and 661’ long. All attendees left with a better understanding of the design of these bridges and some of the challenges faced in construction. We hope to see many of you at the spring bridge tour in Bethlehem.

Lafayette College Student Chapter News  
**By: Chris Skrabak, EIT, A.M.ASCE**

- Started a student mentoring program between upperclassmen and incoming sophomores.
- Engineering Activity Fair – Aimed at freshman and sophomores, introduced the various engineering clubs and organizations on campus
- Student Social Night – Students gathered for a highly educational presentation of The Lego Movie
- Steel Bridge Team (previous regional champions!) – Presentation on their experience at the national competition and gave preliminary ideas for next year’s competition
- Engineering Lunch: Jason Snyder, P.E. – Geosynthetic Reinforced Soil-Integrated Bridge Systems
- Annual Resnik Lecture: Recycling Opportunities, Technology & Illusions – Dr. David B. Spencer, retired CEO of wTe Corporation, gave a presentation on his experience as a recycling entrepreneur. A leader in plastics and metals recycling, he offered students an insider’s view of the recycling industry and advice for the up and coming entrepreneur.
- Film screening at the Nurture Nature Center in Easton DamNation: Exploring the changing attitudes on dams within the United States
The Eighth Street Bridge, A Legend in its own Right
By: Joseph R. McFadden, A.M.ASCE

Last year marked the 100th anniversary of the 8th Street Bridge and it is only fitting that it will receive a much needed face-lift. Like many celebrities these days, this bridge is constantly battling the aging process; which from time to time requires some augmentation to prolong their youthfulness or in this case, functionality. In 1974, the bridge was appropriately named after a local celebrity in Allentown Band conductor, Albertus L. Myers.

Standing at 138 feet high and 2650 feet long, the bridge was once the longest and highest concrete bridge in the world when it first opened in November of 1913. As if a sports star charging a fee for an autograph, the bridge was tolled until the 1950s at 5 cents per automobile. In June of 1988 the bridge was added the U.S. National Register of Historic Places; the so called “Hall of Fame” of bridges.

On October 28, 2014, members of LVASCE received “VIP” access to the ongoing rehabilitation project. PennDOT’s Inspector-In-Charge, Mike Guidon, escorted us through the site where construction was well underway as crews placed concrete for the new bridge deck and set beams in the approach spans.

Following the tour, members congregated at the Allentown Brew Works for a presentation by Project Manager, Chris Stanford of Michael Baker International. Chris explained the innovative design approach and challenges of rehabbing a historical bridge.

Often with fame comes misfortune. Unfortunately the bridge has a darker side as it has been a site of numerous suicides over the years. Much to the delight of the surrounding community, this rehab project incorporates the installation of a protective fence to deter anyone from jumping off the side of the bridge.

The project is expected to take approximately 2 years to complete and when finished will once again act as the proverbial red carpet to Allentown’s revitalized downtown which includes the newly added PPL Center, home of the LV Phantoms Hockey club. The venue has already attracted other legends such as Tom Petty and the Heartbreakers and The Eagles.

ATLSS Research Center Visit
By: Muhannad Suleiman, Ph.D., M.ASCE

LVASCE arranged a visit to Lehigh University’s Advanced Technology for Large Structural Systems (ATLSS) on September 25, 2014. This event was attended by practicing engineering, students and faculty.

The event was divided into three parts. Initially, a presentation was given on the capabilities of the testing facility and the addition of a soil-structure interaction testing facility, which has been used to test foundation systems. The participants then toured the testing facility and staff member Peter Bryan explained the various testing projects that were on the floor at the time. These projects included unbonded post-tensioned cast-in-place concrete walls for seismic resistance; post-tensioned coupled shear wall systems; enhancement of seismic performance and design of partially grouted reinforced masonry buildings; reserve capacity in new and existing low-ductility steel braced frames; inertial force limiting floor anchorage systems for seismic-resistant building structures; precast concrete panel connection evaluation; and ground improvement and deep foundation testing. The visit concluded with videos of previous experiments conducted at the testing facility.
Revival of the Younger Member Leadership Symposium
By: Chris Skrabak, EIT, A.M.ASCE

The Younger Member Leadership Symposium (YMLS) was held this past September at the ASCE headquarters in Reston, VA. Held simultaneously with the President’s and Governor’s Forum (PGF), the gathering also offered an opportunity to meet with ASCE’s current leaders and offered leadership and management workshops for members under 35. In addition to the budgeting and scheduling basics, the conference covered topics such as “how to manage your boss”, identifying different personality types, and how to have difficult but necessary conversations. Much more than simple presentations, the workshops were a valuable chance to talk to the people who have been there and done that. Hearing everything from the best successes to the breakdowns of projects-gone-wrong, it was a great platform for us younger members to see what lies ahead as we climb up the corporate ladders. Any younger members interested in attending next year’s YMLS (tentatively scheduled for September 21-22, 2015) should contact YMF President Bethany Malusa at bmalusa@benesch.com

Region 2 Assembly
By: Greg Kuklinski, P.E., M.ASCE

Over 90 Region 2 members attended the Region 2 Assembly at the Penn State University Harrisburg Campus in Middletown, PA on November 8. The focus of this year’s assembly was to continue to foster interaction between ASCE Student Chapters/Universities and Sections and to encourage all attendees to get more involved and make an impact as an Engineer beyond what we do in our careers. The Assembly was led by Region 2 Director, Chris Menna, P.E., F.ASCE and the Region 2 Governors. Also at this assembly, the Region 2 Younger Member Council met and the Student Members discussed the Steel Bridge and Concrete Canoe Competitions. Some of the other topics discussed included Engineers without Borders, an ASCE Report Card Discussion, a presentation on Networking and a presentation on the use of LIDAR. Two Section members presented at the conference. Peter Aziz, S.M., ASCE, from McTish, Kunkel and Associates gave a presentation on a BIM project at the Penn State University Harrisburg Campus and gave all the attendees a virtual BIM video tour through the Educational Activities Building that we were sitting in! Greg Kuklinski, P.E., M.ASCE, from Alfred Benesch & Company and Daryl Morais, Aff. M.ASCE from ASCE HQ in Reston, VA gave a presentation about resources available from the National Leader Training Committee and the Geographic Services Department. Greg is a current member of the Leader Training Committee and responsible for planning and organizing the President’s and Governors Forum in Reston, VA each September.
Structural Engineering Institute – Lehigh Valley Chapter Report  
By: Cheryl L. Rishcoff, P.E., M.ASCE

SEILV held our second-annual Half-Day seminar this past August at ATLSS, Lehigh University, Bethlehem, PA. It was a success with four presentations on various structural topics with about 40 professionals and students attending, and 4 PDH’s awarded to attendees. Three of the speakers were local SEILV members. Sougata Roy, PhD, M. ASCE, of ATLSS, gave a very entertaining presentation on a mega move on the PA Route 30 Wrights Ferry Bridge. James Pudleiner, PE, LEED AP, M.ASCE and Mike Rohl, P.E., M.ASCE of Alfred Benesch, gave a presentation on the complex erection issues of the Allentown Arena trusses.

We are planning on making this an annual end-of-summer event, and are looking for speakers for the 2015 seminar. If you are interested, know someone who would be interested, or have a topic that you would like to learn more about, please let me know. Attending is a great way to fulfill the continuing education requirements for the Pennsylvania PE renewal which happens in September of 2015!

I also had the opportunity to attend the SEI Local Leadership Conference on Oct 24-25th, in San Diego, CA. This is a meeting where the chairs of the SEI chapters and local structural groups get together to discuss and compare what others are doing around the country in their local groups. We discussed continuing education, social media, community outreach, and also learned about the structure of SEI and the resources that are available to us as SEI Chapters. Frank Artmont, who is chair of the Lehigh University Graduate Student SEI Chapter, also attended.

Included in the conference was a technical tour of the UCSD Englekirk shake table at UC San Diego, which is the second largest shake table in the world. The tour also included going underneath the table to see the inner workings.

Upcoming SEILV Events:

**December 15, 2014** - ASCE Live Webinar - Design of Masonry Shear Walls – will be hosted at LVTA’s office. There will be more information in an upcoming e-mail and also on the website.

**February 20, 2015** - First of four Khan Lectures at Lehigh University – William Pedersen presenting “Balancing.” New for 2015 - SEILV will be co-hosting the Khan lectures and offering 1 PDH for attending professionals. Cost is free.
Are you scheduled for the April P.E. Exam? Do you have employees or co-workers preparing for the exam? For the benefit of ASCE members and any others who are interested, the Lehigh Valley Section is making arrangements to host ASCE’s live P.E. Civil Exam 12-Part Review Course right here in the Lehigh Valley. In order to accommodate our members a minimum of 6 members must sign up.

Course Description
Earning your P.E. license is one of the most pivotal steps in your career – make sure you are well prepared for this essential milestone by enrolling in an ASCE Review Course. This course is a series of 12 two-hour, live webinars held over a six-week period, covering topics and material that have high probability of appearing on the exam, according to your instructors’ experiential insight. You’ll benefit from immediate feedback and assistance from your instructors during the live webinars, and supplement your learning with on-demand recordings of the sessions.

Course Schedule
All Live Webinar sessions are scheduled for 3:00-5:00 p.m. Eastern Standard Time and courses begin February 3, 2015. If you are unable to attend a live session, don’t worry, you’ll have free access to an on-demand recording.

Registration
Normally this course costs $1,395; however, if a minimum of 6 members sign up through LVASCE, the registration fee is only $450! This is a great way to prepare for the PE Exam. Please contact Jim Hendricks at jhendricks@rettew.com or any board member if you have an interest in the upcoming spring sessions. More information is available at www.ASCE.org by selecting the Exam Reviews under the Education & Careers heading.

---

Lehigh University 2015 Fazlur R. Khan Distinguished Lecture Series

1st Lecture: WILLIAM PEDERSEN,
Founding Design Partner, Kohn Pedersen Fox Associates, New York, NY
"Balancing"
Friday, February 20, 2015 - 4:30 pm

2nd Lecture: GLENN R. BELL,
Chief Executive Officer, Simpson Gumpertz & Heger Inc., Waltham, MA
"Structural Engineering at Mid-21st Century: Reengineering Our Roles"
Friday, March 20, 2015 - 4:30 pm

3rd Lecture: PETER MARTI,
Professor of Structural Engineering, ETH Zurich, Zurich, Switzerland
"Science and Art of Structural Engineering"
Friday, April 17, 2015 - 4:30 pm

Location: Sinclair Lab Auditorium
Lehigh University
7 Asa Drive Bethlehem, PA

For additional information about the Fazlur R. Khan Distinguished Lecture series please visit: http://www.lehigh.edu/frkseries
The Lehigh University Bridges to Prosperity completed its first footbridge project in Panama this past June, and is set to do it again this year. In early summer, 7 students, accompanied by Lehigh faculty members, made the journey to Vallecito Panama, where they were met with a determined and hardworking community, as well several major challenges. Their goal was to help the community build a footbridge over El Rio Indio, a river that divided the people on either side and created a major obstacle in their daily lives. During the rainy season, a 4-month long period in which the river floods and becomes too dangerous to cross, children on one side did not have access to the school on the other. Additionally, the families in Vallecito did not have safe access to the paved road and thus civilization including health care facilities. With the Vallecito Bridge now in place, the members of this community now have year round, safe access to the basic needs that many people take for granted.

This year there is a new team of passionate Lehigh students working to solve a similar situation, this time in the isolated community of Vaquilla, Panama. The team is currently working to fundraise the $12,000 toward the cost of the bridge as well as the additional travel expenses associated with the project. The site survey has already been completed and the team has turned to the design of the bridge, an opportunity to apply what they are learning in class in a practical and meaningful way.

This is a project that is life changing for both the Panamanian communities being impacted and the Lehigh students involved. The experience shapes students professionally and culturally. It gives people in need the opportunity to prosper. If you are interested in following the story of the Vaquilla Bridge, please visit the Lehigh team’s facebook page: https://www.facebook.com/BridgesToProsperityLehigh. And if you are interested in helping to make this bridge a reality, and would like to donate to this effort, please visit the team’s crowd funding website: http://ignite.lehigh.edu/b2p. Every donation goes a long way in supporting the success of this important project!
Inaugural LVASCE Mini-Golf Outing
By: Bethany Malusa, P.E., M.ASCE

The Younger Members Forum held a Mini Golf Tournament on August 20th at Putt U in Center Valley. Thankfully the rain held off until after the celebratory ice cream. Ed Russell from Michael Baker Intl. won the Tournament with a score of 54 or 3 under par for the blue course!
LVASCE Annual Holiday Banquet

**Date:** Friday, December 5, 2014

**Time:** 5:30 pm-8:30 pm

**Location:** Fowler Blast Furnace Room
ArtsQuest Center at SteelStacks
101 Founders Way, Bethlehem, PA 18015

**Topic:** Incorporating Allentown’s Water and Sewer Systems
**By:** Aurel M. Amdt, General Manager, Lehigh County Authority

Holiday music provided by Cliff Cole & Robert Williams

**Please Register by Wednesday, December 3rd**

[Click Here To Register]

ASCE Younger Members Bowling Night

Come Network and Bowl with other young Civil Engineers!!

**When:** Thursday, January 15, 2015

**Time:** 5:30 – 7:30 pm

**Where:** Revolutions Main Bar
(Inside to the Left)
3717 PA 378, Bethlehem PA 18015
(In Saucon Valley Square)

Drink Specials
Appetizers will be provided

THE PIDCOCK COMPANY
CIVIL ENGINEERING
LAND PLANNING
ARCHITECTURE
LAND SURVEYING
FOUNDED 1924
www.pidcockcompany.com
Introducing the New ASCE Website!

The website committee is proud to announce that LVASCE’s new website is now live! The committee spent the past year working with J Taylor Design to develop a user friendly and modern website. The new website places greater emphasis on promoting upcoming events. Check out the new calendar for a complete list of upcoming events, and subscribe to the calendar to stay up-to-date with ASCE.

The website is also your source for civil engineering job postings. Local firms can now advertise career opportunities on the ASCE website for no charge. The new website already lists several local civil engineering job opportunities.

We would also like to feature photographs of local landmarks and projects on our homepage. Please submit photos to Ben Guthrie at bguthrie@trafficpd.com

Thank you to our sponsors for supporting this important initiative. Our new professionally designed website would not have been possible without your support.

Job Postings:

LVPC – Director of Transportation Planning
LVPC – Senior Transportation Modeler
Upper Macungie Township – Sewer Authority Manager
CeraTech USA – Regional Sales Manager
HDR Job Postings
DiGioia Gray & Associates – Construction Monitoring Engineer
Monroe County Conservation District – Hydraulic Engineer
