McTish, Kunkel & Associates is seeking a Senior Highway Engineer/Project Manager to join our Allentown, PA office. The primary duties of this position are to serve in a technical leadership role for the engineering development of urban and rural highway/bridge projects. The team player we seek must have a BS or MS degree in Civil/Transportation Engineering, a PA PE license, and 10+ years of experience working on PennDOT, PA Turnpike Commission, or similar projects. Candidate must have proficiency in supervising, managing staff and an understanding of all aspects of highway design.

The Senior Highway Engineer/Project Manager will work collaboratively with other engineers on projects for PennDOT, regional and local agencies and should meet the following requirements:

- BS or MS degree in Civil Engineering from an accredited university.
- PA PE License; 10-years min. of progressive highway design experience.
- Familiarity and experience with PennDOT standards/publications and procedures.
- Experience in Stormwater Management and/or Traffic Engineering is a plus.
- Experience and knowledge in PennDOT web-based applications is a plus. (ECMS, ASTA, KEES, etc.)
- Proficiency in Bentley Power InRoads and Microsoft Office Suite products.
- Excellent interpersonal skills, team work, and communication skills, both written and verbal (English).
- Self-motivated with the ability to work independently or as part of a team.

McTish, Kunkel & Associates is an established professional services firm that offers our full-time employees competitive compensation packages, medical, dental, vision coverage, life insurance, short and long-term disability options, 401(k), training/professional development and much more. We are an equal opportunity employer. EOE AA M/F/Vet/Disability.
