

McTish, Kunkel & Associates is seeking an Entry Level Civil Engineer to join our Structural Engineering Department in our Allentown, PA office. The successful candidate will be part of a team designing simple and complex bridges (primarily of steel and concrete construction) and a variety of transportation related structures (retaining walls, culverts, sign structures, and other miscellaneous structures) using applicable software. The candidate will also be involved in the development of contract plans, the preparation of engineer's estimates and construction specifications, and performing construction support services. Applicants must demonstrate the following:

- BS in Civil Engineering
- FE/EIT preferred
- 0-2 years of experience
- Proficiency in MS Office software, MicroStation and/or AutoCAD
- Strong written and verbal communication skills
- Excellent interpersonal skills, team work, and communication skills, both written and verbal (English)
- Self-motivated with the ability to work independently and within a team setting.
- Attention to detail and quality work products
- Prior internship or summer work experience preferred
