

AMERICAN SOCIETY OF CIVIL ENGINEERS

LEHIGH VALLEY SECTION

CIVIL ENGINEERS MAKE THE DIFFERENCE . . . THEY BUILD THE QUALITY OF LIFE

NOMINATION FORM - 2019 YOUNG CIVIL ENGINEER OF THE YEAR

Award Criteria

1. Purpose – The purpose of the Lehigh Valley Section of the American Society of Engineers (LV-ASCE) *Young Civil Engineer of the Year* award is to recognize and distinguish, in a dignified public way, an outstanding young civil engineer each year. The award does not focus primarily on work for and on behalf of ASCE, since other awards serve this purpose. Instead, this award focuses on young civil engineers who have distinguished themselves by outstanding achievements and contributions to the civil engineering profession, to the education and support of younger engineers and future engineers, and to the community at large (referring to the local, regional, national, and international communities).
2. Eligibility – For consideration, a Nominee for the Lehigh Valley Section of ASCE *Young Civil Engineer of the Year* award:
 - A. Must be 35 years old or younger as of December 31, 2019.
 - B. Must be nominated by a member of the Lehigh Valley Section of American Society of Civil Engineers. The member submitting the nomination must submit a completed *Nomination Form for 2019 Young Civil Engineer of the Year* to the current Chair of the LV-ASCE Nominations and Awards Committee.
 - C. Must be a member of the Lehigh Valley Section of the American Society of Civil Engineers. Member grades eligible for the award include: Associate Member, Member, Life Member, Fellow, and Honorary Member.
 - D. Nominations will remain valid for two years, provided the age requirement is met.
3. Criteria for Selection – Selection shall be made generally on attainment by the candidate in the following categories:
 - A. Occupational and Professional Achievements:
 - 1) Consideration will be given to the positions held in companies, businesses, government, education, or other work agencies with which the candidate is, or has been, associated. Overall responsibilities, both engineering and otherwise, are the primary criteria to be used as guides in judging. This is not to discount candidates involved in smaller units, agencies or businesses, since responsibility per individual in these instances can be equally as large.
 - 2) Engineering accomplishments such as design, development, education, control, testing, research, technical/professional writing, and other similar efforts will be considered.
 - B. Civil Engineering and Education:
 - 1) The contribution made by the candidates to their profession and to the education of younger and future engineers shall be considered.
 - 2) Engineering technical and professional societies and their branches are generally the medium for professional development work.
 - 3) Aid to educational development includes, but is not limited to: junior engineering and science programs, National Science Foundation programs, high school guidance programs, college seminars and teaching, association or group workshop and technical society committees.
 - C. Civic and Government: The active citizenship of the candidate as expressed in volunteer involvement in the affairs of the community, which may refer to local, regional, national, or international communities, shall be a factor. In this category, items considered may include:
 - 1) Recognized service club or charitable-fraternal organization activity.
 - 2) Community charity organization activity (United Way/Fund drives, for example).
 - 3) Public Office – school board, municipal governing body, county, state or federal office.
 - 4) Quasi-public bodies – examples include activity in civil defense, hospital, YMCA, etc.
 - 5) Semi public – non-paid government appointed boards, commissions, and study committees.
 - D. Additional considerations:
 - 1) Accomplishments during the prior year will be given emphasis in the selection process.
 - 2) It is preferred, but not required, that nominees be Registered Engineers.
 - 3) Letters of recommendation from peers, superiors, and associates of the candidate are encouraged.
4. Contact information for both the nominating individual and the nominee should be provided.
5. Contact **Michael Derr** at office number **215-536-8363** or email **MDerr@gtang.com** with any questions.
6. **ALL NOMINATIONS MUST BE SUBMITTED TO THE ABOVE E-MAIL ADDRESS BY January 31st, 2020.**
